

St. Andrews Institute of Technology and Management

Unit 2(Abstracting Mechanism)

Assignment-1

- Q1. What are constructors and destructors in C++ ? What are the advantages of using constructors ? Explain in detail.
- Q2. Explain different types of constructors. Can we have more than one constructor in a class ? If yes, explain the need for such a situation.
- Q3. What are access specifiers ? Mention the different types of access specifiers. Also, explain the two of them.
- Q4. Define references. How are these useful and used ? Explain with examples in C++.
- Q5. What do you mean by static members and static member functions of a class ?
- Q6. Write the difference between reference and pointer.
