

ASSIGNMENT

UNIT I

NOTE

❖ Attempt any five out of the following

1. Explain the evolution of the C programming language highlighting its key milestones and contributors.
2. Discuss the significance of C in the field of programming, including its versatility, efficiency, and widespread usage.
3. Define the C character set and explain its significance in programming.
4. Differentiate between identifiers and keywords in C with examples.
5. Enumerate and describe the various data types available in C.
6. Explain the concept of constants and variables in C programming with suitable examples.
7. Illustrate the syntax and usage of the assignment statement in C.
8. Define symbolic constants and explain their role in C programs.
9. Discuss the basic structure of a C program including header files, main function, and user-defined functions.
10. Explain the purpose and usage of the printf() and scanf() function in C.
11. Differentiate between arithmetic, relational, logical, and bitwise operators in C.
12. Discuss the concept of operator hierarchy and associativity in C.
